Experience

Website Developer / Executive Assistant · **The Source of Hope** August 2025 – Present

- Designed, developed, and maintained responsive websites using WordPress, React.js, and Tailwind CSS, enhancing site performance and user experience.
- Led a two-person web development team, assigning tasks and coordinating workflows to ensure timely delivery of website improvements.
- Managed front-desk responsibilities including client communications, scheduling, and correspondence to support executive operations.
- Collaborated directly with clients to gather requirements, provide updates, and ensure website solutions aligned with business needs.
- Optimized website functionality and content for accessibility, SEO, and mobile responsiveness, improving client visibility and engagement.
- Balanced technical web development projects with executive support functions, demonstrating adaptability and organizational efficiency.

Associate · **Walmart** May 2025 – Present

- Provide friendly, efficient customer service by assisting shoppers with product selection, locating items, and answering questions to enhance the shopping experience.
- Operate cash registers accurately and handle transactions including cash, credit, and returns with attention to detail.
- Maintain cleanliness, organization, and stock levels on the sales floor, ensuring products are properly displayed and shelves are fully stocked.
- Collaborate with team members to manage busy periods, support store operations, and uphold Walmart's standards for safety, quality, and customer satisfaction.
- Assist with unloading deliveries, organizing inventory, and performing basic merchandising tasks to keep the store running smoothly.

Associate · **Andy's Frozen Custard** May 2025 – August 2025

- Prepare and serve high-quality frozen custard products efficiently in a fast-paced, customer-focused environment.
- Maintain cleanliness and organization of the service area to ensure compliance with health and safety standards.
- Deliver friendly, accurate service while handling customer orders, modifications, and special requests with attention to detail.
- Collaborate with team members to manage busy periods effectively and uphold brand standards for product quality and speed.

Skills

Programming Languages

Java, Python, HTML, CSS, JS

Tools & Platforms

Git, GitHub, Gradle

Projects

Exo-arm: Assistive Robotic Exoskeleton

Developed a wearable robotic exo-arm* designed to reduce musculoskeletal strain for construction workers by supporting upper body movements during repetitive or overhead tasks. The project focused on ergonomic design, user-driven testing, and mechanical assist using lightweight materials and actuator control.

Education

The University of Texas at Dallas · Fall 2025 – Present

Bachelor of Science in Computer Engineering
Certification of Semiconductor Technology
Certification of Cyber Defense

Interests

Photography, Guitar, Robotics, Fantasy & Sci-Fi Novels, Light Novels, Anime, Manga, Manwha, and Manhua, Vinyl Collecting.
